WORK EXPERIENCE

Capital Municipality of Mendoza - Software Development 08/2023 - Currently

I work as a Fullstack Developer for the Development and Systems area, where I use Java and Spring Boot expertly in my responsibilities as a programmer, we also use React, NodeJS, MySQL, MongoDB and Linux. This experience gave me the opportunity to strengthen and enrich my skills in Java and Spring Boot, contributing significantly to my professional development in the field of programming. Implementing the SCRUM methodology.

Backend Programming Teacher/Tutor - Egg Cooperation 11/2021 - 12/2022

Being part of the tutorials allowed me to develop my Softskills and understand the importance of cooperation. Being able to contribute to the Egg community as a teacher was very satisfying. This role came up as a result of my previous knowledge in programming and my performance during the course. I found a space for self-knowledge and help with my peers.

ACADEMIC EXPERIENCE

- Santísima Trinidad - Technical English - 2023 | 2023 - Finalizado
